PROJECTS

Classroom Management System

Build on Node js

- A web app for managing the whole class.
- It has many features which can help a teacher.
- notes, attendance, assignment, paid events, gallery, announcement, and real-time notification are the main key features.
- razorpay and Paypal payment gateway is used

KIVLIK Car washing - Canada project

MERN stack project - freelance

- Developed Node js REST API for both web app and mobile app.
- Planned and implemented the whole module.
- Designed admin panel and integrated all APIs for admin.
- Features are car wash booking, timeslot, admin and sub-admin, admin can upload car package, etc

EETYA B2B Business - US project

MERN stack project - freelance

- Converted monolithic projects to microservices.
- recoded existing features because of imperfect implementations and bad practices.
- Decreased API responding time.
- Restructured react app with best state management.
- It is a B2B e-commerce platform where manufacturers and buyers are present. There is a sales rep option for boosting sales.
